

Materials for the manufacturing of furniture and interiors

We offer innovative and modern finishing materials for furniture and interior. We cooperate with foreign manufacturers and their representatives and we seek to attract customers by the variety, exclusiveness and quality of materials. In the time of uncountable offers, the confrontation with the lack of information is rather usual, when seeking to realize an original idea. Very often an interesting conception remains unrealized, that's why we not only sell, but also offer individual consultations in the area of application of materials. We are oriented to client, who seeks innovations and non-standard solutions.

WE SUPPLY THESE MATERIALS:

- **TABU** – natural, natural dyed and multilaminar veneer
